

GLOBELEQ

Globeleq is an experienced operating power company, developing energy solutions for the emerging markets of Africa and the Americas. The company develops economically sustainable businesses that support the continued development of the electric power sector in these regions and actively participates in the communities in which it operates.

leading the way

DEDICATION, EXPERIENCE, PROFESSIONALISM

The company was launched in 2002 when the UK's CDC Group contributed both equity capital and a portfolio of power assets to the new enterprise.

Since Globeleq's inception, the company has become a power industry leader in the emerging markets by operating or acquiring interests in multiple power facilities, totalling more than 13,000 megawatts (MW) of generation capacity in over 25 countries.

Ownership of Globeleq was transferred in 2009 from CDC to Actis Infrastructure 2 (AI2), a fund managed by Actis, the leading emerging markets investor with more than \$5 billion under management. CDC continues to be a key stakeholder in Globeleq's business as a material investor in AI2.

generating power for emerging markets

Globeleq focuses on operating and developing safe, clean, reliable and sustainably priced electricity in the emerging markets. The company has achieved rapid growth through development of new power generation projects and acquisition of operating facilities.

Globally, demand for renewable energy is playing a key part in power supply infrastructure and Globeleq views development of renewable assets as an important component in its strategy in markets where the relevant fuel source makes sense.

Globeleq's strength lies in its extensive knowledge, experience and ability to operate, develop and invest in technologies to suit its target markets. Capital is invested to enhance the performance of its existing assets, acquire additional assets and develop greenfield projects.

SAFE RELIABLE ELECTRICITY

Globeleq's rigorous investment policies ensure each project is suited to market conditions and is financially sustainable in its own right. All power facilities are operated to a high standard of employee and public health and safety. Operations comply with local and international laws, including World Bank guidelines and minimise environmental impact.

BUSINESS	COUNTRY	FUEL TYPE	GLOBELEQ ROLE	CAPACITY
Songas	Tanzania	Natural gas	Owner-Operator	180 MW
PESRL	Costa Rica	Wind	Owner-Operator	23 MW
Azito	Cote d'Ivoire	Natural gas	Owner-Operator	288 MW
Cerro de Hula	Honduras	Wind	Owner-Operator	102 MW
EOLO	Nicaragua	Wind	Owner-Operator	44 MW
Tsavo	Kenya	Fuel oil	Investor	74 MW

project development

SUCCESS THROUGH PARTNERSHIP

Working closely with local stakeholders to meet current and future electricity demands in Africa and the Americas, Globeleq's experienced team of professionals is focusing on building a diverse portfolio of new power projects and acquisition opportunities.

Recognizing the importance of the sector to government policy, Globeleq adopts a partnership approach with governments, regulators and other key stakeholders to deliver these policy objectives. Globeleq's multi-disciplined team successfully takes projects from concept to development to construction management and commercial operation. Globeleq has the following projects currently under construction or late stage development.

PROJECT	COUNTRY	FUEL TYPE	DESCRIPTION	FINAL CAPACITY
Costa Rican Wind	Costa Rica	Wind	Final development/greenfield	4 x 20 MW
Orosí	Costa Rica	Wind	Final development/greenfield	50 MW
Azito	Cote d'Ivoire	Natural gas	Construction of 139MW expansion; 420 MW steam conversion	
Cerro de Hula	Honduras	Wind	24 MW expansion	126 MW
Jeffreys Bay	South Africa	Wind	Under construction	138 MW
Droogfontein	South Africa	Solar	Under construction	50 MW
De Aar	South Africa	Solar	Under construction	50 MW
