CAREER EXPO

We are delighted to have partnered with fellow IPPs and stakeholders in the Khai Ma region of Northern Cape to organize a career day for Grade 11 and 12 students in the community.

We extend our gratitude to all involved for their wholehearted dedication, which played a pivotal role in the tremendous success of the event.

Together with Konkoonsies Solar, other stakeholders included: Xina Solar One; KAXU SOLAR ONE (RF); Konkoonsies II Solar; Konkoonsies Solar Power; Lima Rural Development Foundation.

BUILDING EDUCATION BY FUNDING STUDENTS

Our bursary programme, benefiting Pofadder, Onseepkans, and Pella communities, supported Cyvanique Brandt (20). She completed a Higher Certificate in Childhood Education last year and is now pursuing a Bachelor of Education in Intermediate Phase.

This bursary transformed her life, allowing her to fully focus on her studies without financial worries, relieving her parents of the burden.

"I'm thrilled for the chance to make a positive impact on my students' lives. Witnessing their growth throughout the school year is incredibly fulfilling." - Cyvanique

EMBRACING OUR BIODIVERSITY

Solar plants are already known for producing electricity without polluting the air, however, Konkoonsies Solar Power has been able to further reduce its environmental impact, through the implementation of a number of biodiversity interventions.

One such intervention has been relying solely on rainwater to wash our solar panels, saving approximately 180,000 litres of water each year since 2020.

"Over the years, our solar farm has become a home to many flora and fauna, happily co-existing amongst the panels, enjoying the benefits of renewable energy."
