EMPOWERING COMMUNITY FARMERS

Ongoing support for small-scale farmers is helping improve agricultural production in our communities. Through our enterprise development programme, we have been able to assist Kruidfontein Farm in expanding its vegetable production and growing lucerne for animal feed, which benefits the broader farming community as well.

“Despite the agricultural potential, many farmers struggle due to lack of funding, forcing them to self-finance, which is incredibly challenging.” - Noluthando Mazibuko, ED Specialist

The growth of Kruidfontein Farm promises to create new jobs and contribute to local food security.

BUILDING RENEWABLE ENERGY LEADERS

Our internship programme mini-documentary launched this year, showcasing how this industry-leading initiative is shaping the next generation of renewable energy professionals.

The documentary features our Site Intern, Nketa Leteane, who shares her personal experience and thanks for the invaluable mentorship she's received.

Watch the mini-documentary here: <https://boshofsolar.co.za/videos/>

“This internship has given me the skills and knowledge to advance my career. The support from my seniors has been incredible—they’ve guided me every step. I’ve learned so much and feel ready to take on the future in renewable energy.” - Nketa Leteane

A DECADE OF SOLAR PV IN BOSHOF

Our solar facility celebrates 10 years of producing clean, renewable energy! This energy supports the national grid, powering homes and businesses across the country.

We owe this success to the hard work and dedication of every team member, both past and present. To mark the occasion, we come together to enjoy a celebratory meal.
