

BENEFITTING THE ENVIRONMENT AND SUPPORTING LOCAL COMMUNITIES

NEWSLETTER
2024

"These small businesses stand out for their dedication, hard work, and ability to keep improving and growing, even when facing tough challenges."

NEW LOCAL ENTREPRENEURS SUPPORTED

Three local businesses—Felemach, JBG Trading, and KM Wood Designz—have joined our Enterprise Development Programme, benefitting from mentorship, training, and funding to help them thrive.

Felemach specialises in electrical contracting, while JBG Trading focuses on poultry farming, and KM Wood Designz manufactures bespoke furniture.

This programme is designed to help local businesses grow and create jobs in the community. By giving them the support and tools they need, we aim to help entrepreneurs succeed, positively impacting the local market.

NEW FACILITIES FOR GREENPOINT CRECHE

Pikkewyntjie Crèche reopened with upgraded facilities, providing a safe and enhanced learning environment for 75 children in its care. The renovation included structural repairs, a new classroom, and upgraded playground equipment. Staff training, mentorship, and assistance with compliance were provided.

"Our long-term vision is to support ECD centres in becoming sustainable institutions that offer quality care and education." - Harrisinah Theka, Economic Development Manager

10 YEARS OF SOLAR ENERGY

We proudly mark a decade of generating clean, renewable energy for South Africans. Beyond electricity, our Economic Development programme actively supports local businesses, boosts job creation, and strengthens our community.

Thanks to our dedicated team, past and present, our journey continues with a clear focus on sustainability and community growth for the years ahead.
