EMPOWERING LOCAL FISHING COMMUNITIES

Our local fishing community had cause for celebration with the handover of fully registered fishing vessels to the Sarah Baartman Co-Op in Loerie and the Elinye Co-Op in Humansdorp. This initiative also provides the co-ops with business and technical support to help them become financially stable, boosting the local economy and creating lasting job opportunities.

This comprehensive support aligns with the country's drive for sustainable growth in the maritime sector, particularly in coastal communities like ours.

"The wind farm's assistance has been pivotal in paving the way forward for our co-op" - Resheen Lucas, Chairman of the Sarah Baartman Co-Op.

UPSKILLING YOUNG ELECTRICIANS

Two electricians from Humansdorp, Kanyisa Goveni and Qaliswa Ndleleni, have joined our inaugural Wind Turbine Technician Training Programme. This initiative equips local youth with essential skills needed for the growth of the renewable energy sector.

The programme aims to bridge the skills gap in the wind energy industry, providing both theoretical and practical learning for future technicians.

Both participants will earn a nationally recognised qualification upon completion, enhancing their employability in the renewable energy sector.

"This hands-on training is a unique opportunity for me to gain specialised knowledge in a growing industry" - Qaliswa Ndleleni

ECD CENTRE CELEBRATES RENOVATIONS

Funding has been provided for critical renovations at the Noxolo ECD Centre in Patensie. These improvements, including new classroom spaces and kitchen upgrades, enable the Centre to meet Health & Safety standards and better serve the community's young children.

Enhanced play areas and other facility improvements have been included, sparking an increased interest from local parents eager to enroll their children.
